Description: This virtual class will teach troubleshooting principles to evaluate and improve Activated Sludge plants and Biological Nutrient Removal processes. This class will focus on troubleshooting process problems for each section of the Activated Sludge plant and the BNR process and how important it is to proceed in an organized manner to check all the possibilities to reduce or eliminate the cause of the problem. Class instructors will discuss process control calculations relating to troubleshooting, evaluation, and process correction. Participants are to bring a notebook, pen, pencil, 2017 ABC Formula Sheet for Wastewater Operators, calculator in preparation for class.
