

2023 Annual Conference

April 17, 2023 MONDAY CLASS

6 CPEs | 9am - 4pm | April 17, 2023 | Hotel Roanoke
Breakfast included / Lunch - one hour break on your own

OSHA at a Glance

Eddie Shelton - VRSA Safety Specialist

This course will cover several OSHA required programs to help participants understand the laws that apply to them.

Topics to be covered include

- Introduction to OSHA
- Requirements working with contractors
- Permit-required confined space entry
- Hazard communication (requirements working with chemicals)
- Personal protective equipment requirements
- Electrical safety to include lockout tagout
- Trenching and excavations

OR

Tools and Tech for Business Continuity in Public Works

Carl Brown - Getting Great Rates

Arnab Bhowmick - Aktivov Asset Management

Staff come and go. Facilities are built and function for a while, but also must be replaced eventually. Everything changes over time in the public utility services realm except for one thing – the show must go on.

This session covers asset management, rate analysis and rate setting as overarching themes. The trainers will drill down into major technologies, business processes, resource requirements, business continuity and succession planning, emergency response and crisis management, use of the “Cloud” and mobility, use of a distributed workforce, and other critical issues organizations need to handle well to be high-performing, resilient and sustainable.
