

Water/Wastewater Operator

Status: Full-time or Part-time

Pay: \$30.00 - \$40.00 DOQ

Job description:

Job Summary

The Town of Glasgow, VA is seeking a dedicated and skilled Water/Wastewater Operator to join our team. The operator is responsible for the operation and maintenance of the water distribution system and wastewater treatment facility, ensuring compliance with environmental regulations and standards. This role requires a strong mechanical aptitude and understanding and ability to work with various equipment while maintaining a safe and efficient work environment. Minimum license requirement of Class 3 wastewater and Class 4 water license required prior to employment. Day shift. Flexibility in schedule. Limited supervision - single operator employed by the Town. Residence within 30 minutes of the Town of Glasgow is desired.

Responsibilities:

- Operate and monitor water/wastewater treatment processes to ensure optimal performance.
- Collect and analyze plant and laboratory data related to water/wastewater treatment operations, documenting accurately and reporting to applicable state agencies.
- Operate and maintain distributed control systems to effectively monitor treatment processes.
- Work with Public Works employees and contractors as necessary on repairs and maintenance.
- Conduct regular inspections of equipment and systems, performing necessary repairs and maintenance.
- Perform heavy lifting tasks associated with equipment handling and maintenance.
- Adhere to safety protocols and environmental regulations at all times.

Skills:

- Minimum license requirement of Class 3 wastewater and Class 4 water licenses.

- Strong mechanical knowledge related to water/wastewater treatment operations.
- Proficiency in equipment repair, ensuring all machinery operates efficiently.
- Ability to perform data collection and analysis for operational reporting.
- Proven experience operating wastewater treatment facility with familiarity in equipment repair and maintenance.
- Strong mechanical knowledge with the ability to troubleshoot complex systems involving plumbing, pumps, valves, and electrical controls.
- Math skills for data collection, calculations related to chemical dosing or flow measurements, and analysis of operational data.
- Ability to operate heavy equipment safely and efficiently during routine maintenance or construction activities.
- Physical capability for heavy lifting, prolonged standing, climbing ladders, and working in confined spaces, when necessary, as required by the role.
- Excellent analysis skills to interpret data trends and identify potential issues before they impact plant performance. Join us in making a difference by ensuring the delivery of high-quality water through your expertise! We value energetic professionals eager to contribute their technical skills in an environment dedicated to environmental stewardship and community health.

Benefits:

- Health insurance
- Dental insurance
- Vision insurance
- Life insurance
- Paid time off
- VRS Retirement plan
